NIKAPLAST was established in 2016 on an area of 5000 m² to serve in the Plastic Packaging industry. As NIKAPLAST, all our investments, production and service processes are designed on the criterion of unconditional customer satisfaction.

Our primary goal is to offer our customers the most economical and highest quality products with low cycle times, multi-cavity molds, low waste rates and optimal product weights.

Our other important goal is to keep customer shipment performance at 100% through preventive maintenance, efficient and effective planning.

Hygiene is another criterion that our business emphasizes and does not compromise under any circumstances.

While pursuing all these goals, our greatest support is international production and management techniques such as ISO standards, TPM, Lean Production and, of course, the manpower that has internalized all these systems.

Our company, which produces with IML technology, prefers new generation hybrid and full electric machines in its injection machine selection.

As NIKAPLAST, within the framework of the principles of continuous improvement and perfectionism, we try to perceive customer expectations in advance and evaluate customer opinions and suggestions under all circumstances.

Our Mission;

To offer environmentally friendly, high quality, innovative and competitive packaging solutions to our customers.

Our vision;

To be the Plastic Packaging Company that is preferred primarily in terms of product and service quality in the Sector.

NIKAPLAST Plastic Industry and Trade Inc. As our Quality Policy, behind every service and product we offer to our customers;

To comply with all legal terms and regulations related to sectoral, environmental and OHS,

Adopting customer satisfaction as the primary goal,

To produce with an understanding that does not compromise on quality,

To always keep the bar of our product and service quality above customer needs, with the principle of continuous improvement and development,

To design and implement every process based on Hygiene and Food Safety,

To produce products and services by using the resources in the most accurate and efficient way,

To follow the developing technology on the international platform and reflect it on our investments,

To keep communication within the company at the maximum level,

Evaluating every view that can create added value in our products and services,

Identifying and eliminating all kinds of risks that may cause work accidents,

Reflecting on the management principles that employee satisfaction is as important as customer satisfaction,

To create a team with a high perception of customer, environment, occupational safety and quality through continuous and periodic trainings,

To accept the principle of sustainability as the basic criterion in all investments and applications,

We accept and undertake to raise environmental awareness to the highest levels in the organization.
